Advice for IVE students to study engineering in the UK: choose your subject without restrictions

Oriental Daily

July 19, 2022

Chong Man Hin (left) and Chen Peiying (right) will go to the UK to continue their studies next year.

[News from this newspaper] Current Diploma Examination candidates may be worried about their future studies due to their unsatisfactory results. Fresh graduates of the Hong Kong Institute of Vocational Education (IVE) share their experiences and remind candidates not to set frameworks or restrictions for themselves. They should choose subjects based on their personal interests, actively engage in learning and seize opportunities for value-added, and they will definitely have an ideal future. This year, 13 IVE graduates were awarded the Alistair Harvey Foundation Scholarship and will go to study at universities in the UK in the new academic year.

IVE Higher Diploma in Electrical Engineering graduate Ms Chan Pui-ying will be sponsored to study the Bachelor of Electrical and Electronic Engineering (Honours) programme at the University of Sheffield, UK.

HOT NEWS

1. Deng Zhaozun directly agreed that the three girlfriends did not have close contact with their girlfriends. If they needed it, they could "apply for it on paper" in advance.
2. US media: The People's Liberation Army is ready to take five major steps to lock Taiwan's materials
3. DeepSeek | A major reshuffle of the workplace in the AI era: 10 "high-risk" and "iron rice bowl" occupations exposed
4. Zhou Yongheng was arrested in Tin Shui Wai for allegedly illegally riding a "Hot Wheels" and was pinned to the ground and handcuffed by 4 police officers, screaming for help
5. Wu Yi will undergo surgery for aortic rupture and is at risk of paralysis. He once told his wife not to rescue him if necessary, "It's better for the living."

She said: "Job development should not be restricted by gender. Men and women each have their own strengths. Girls' patience and carefulness can also be utilized in engineering projects." She believes that smart grid will be a major development trend. She hopes to study abroad to learn relevant knowledge and continue to pursue a master's degree. She will then return to Hong Kong to develop her career with the goal of becoming a smart grid engineer.

The Building Services Diploma covers both heating, plumbing and electrical engineering. Another graduate of the Higher Diploma in Building Services Engineering Mr Chong Man Hin, will go to Scotland in the new academic year to study for a bachelor's degree in Building Services Engineering at Glasgow Caledonian University. As his parents are in the engineering industry, he was influenced by them since he was a child. The IVE Higher Diploma in Building Services Engineering programme covers a wide range of subjects, namely air-conditioning, fire protection, plumbing and electricity. He was recommended to intern at a local engineering consultancy company. He believes that the learning experience combines both theory and practice, laying a solid foundation for future development. Looking into the future, he hopes to return to Hong Kong to continue his studies and obtain a registered engineer's license so that he can participate in large-scale planning projects such as Hong Kong's "Northern Metropolitan Area" in the future.
